Finding your way around alerts

Learn how to keep track of the alerts attached to your tools.

ONE-KEY[™] uses alert notifications to help keep you up to date about what's going on with the tools in your inventory. This article will explain how to use and keep track of your alerts from your desktop computer.

You can get a general overview of every active alert and notification attached to your tools from the **Inventory Dashboard**. Here, alerts are displayed as a **blue dot** to the left of your tool's name.

Notice the **white number** inside the blue dot. This number indicates how many active, **unread alerts** are currently attached to this tool. To get a closer look at these alerts, click on the item to pull up its details page.

Here you can click on the tool's **Alerts** in the information bar, located below and slightly to the right of the wrench and hammer icon.

Tool history	Purchase info	Notes	Uploads	Alerts

A list of this tool's alerts will now slide into view on your screen. From here, you can read the content of the alert or choose to **remove** it.

Up	date	Milwa M13	wkee® Model# 2706-2 8 FUEL ™ 1/2=	Hammer Drill		2	imonths ago	Assignr UB Pla	Available	MANAGI
1	ervice date 2/2/19	•	This tool has: 0 Service records an	nd 0 uploads	ADD	%	Total service: 0	Å Dh	ision

One-Key's alert system is designed to look and feel like an email inbox, displaying

which alerts have been read, which ones haven't, and which ones have been deleted and moved to the trashed.
